SolarIQ NYC

Turning underused rooftops into NYC's next power plant

**Presented by
Green Cards**

NYC rooftops sit idle while emissions keep rising

NYC buildings account for ~70% of the city's emissions. Local Law 97 is pushing landlords to cut carbon — but rooftop solar, the most obvious lever, is barely used.

The gap isn't technology. It's information. Owners don't know if their roof works, what it costs, what they'd earn, or how to stack incentives.

WHY ?

No personalized feasibility data

Financing incentives are opaque

One tool. Rooftop to revenue.

 Built for NYC landlords, installers, and utilities

SolarIQ identifies NYC's highest-potential rooftops, sends targeted proposals to building owners, and hands them a complete solar decision package — feasibility, financing, and grid participation — in seconds instead of weeks.

A customer map

Who should we target?

A ranked list of NYC buildings — with outreach-ready proposals auto-sent to high-potential rooftops.

A feasibility study

Is this roof viable?

System size, generation estimate, load offset, and structural flags — backed by satellite imagery.

A financing plan

What will it cost?

Every NYC, state, and federal incentive stacked — showing true payback, not a national average.

A VPP activation path

What can it earn?

Battery sized for the building, then modeled against ConEd dispatch rates to project grid-service revenue.

Four stages. Open data. Fully automated.

Demo

Brooklyn Focused

508 EAST 42 STREET (Click for Details)

STRONGLY RECOMMENDED

 Address: 974 BERGEN STREET

 Usable Root Area: 599 sq ft

 System Size: 9.0 kW

 Annual Energy: 10,778 kWh/year

 Install Cost: \$18,862.20

 Annual Savings: \$2,586.82/year

 Payback Period: 7.3 years

Personalized Solar Report

Each building receives a clear, data-driven analysis showing solar potential, costs, savings, and next steps.

Hi [First Name],

Here's your solar potential report for your property at:

974 BERGEN STREET
BROOKLYN, NY

Solar Potential Analysis

Based on our analysis, your property at 974 Bergen Street is strongly recommended for solar installation. Here are the key details:

**STRONGLY RECOMMENDED**

Address: **974 BERGEN STREET**
